Air Liquide

Air Liquide develops innovative technologies and sustainable solutions, optimizing the use of air and the planet's natural resources, enabling progress and preserving life. Located in over 80 countries, we have more than 1,000,000 customers globally in diverse industries such as steel, food and beverage, electronics and pharmaceuticals. By using gases naturally present in the atmosphere, Air Liquide separates and purifies them into oxygen, nitrogen, argon, and various rare gases and then distributes them to clientele by pipeline, compression, cylinders, or in some cases, produced directly on a clients' site. Air Liquide also uses other natural resources of gas to produce other gases caused by chemical reaction for their clients' usage (hydrogen, carbon dioxide, acetylene, heli...

US Patent and Trademark Office

USPTO's mission is supported from our headquarters in Alexandria, Va., and from satellite offices in Detroit, Dallas, Denver, and Silicon Valley, Calif. The Detroit office opened in 2012, and the other offices are scheduled to all be fully operational in 2014. With offices in every time zone, the USPTO has a geographic distribution designed to foster the contributions that intellectual property make to a growing economy. The four satellite offices serve as hubs for innovation and creativity, and allow us to serve entrepreneurs better than ever before by helping them protect their intellectual property so that they can attract capital, put their business plans into action, and help create more jobs.
